

# Foundations of Evidence-Based Strategies

## School Age

10.5  
hours

*"A must for anyone working with students with ASD. My colleagues and I feel everyone in our building should be required to take this course. It provides so much practical help. And it reinforces the essential message - presume competency."*

### Learn Valuable Strategies Today!

During the elementary and middle school years, school-aged individuals with ASD are developing skills in many areas that will impact their futures. This 10.5 hour course presents evidence-based strategies in action in home, school, and community environments.

**Earn a certificate of completion and CEUs from many participating organizations.**
